Rear camera view switcher

Monitor picture will be changed to rear view CCD camera automatically when the reverse gear be switched.
- Dimension(L x W x H) : 82x60x25mm

Connect 1 or 2 video (PAL/NTSC) sources to this switch and your camera. Then connect the switch with the vehicle rear light power (12VDC). The switch then automatically will switch to the camera view, when the rear gear is shifted in !
