Smartphone-Uplink SPU700 (iPhone)

In this manual you will find installation instructions for iPhone.

Sie benötigen :
- Smartphone-Uplink Display SPU700
- Smartphone-Uplink App f. iPhone
- A jailbreaked iPhone smartphone
- An HDMI-cable and iPhone-adapter (or VGA-iPhone-adapter)

1.) Connect your smartphone with the Smartphone-Uplink Display..
     (eg. by HDMI or VGA)

2.) Install the app „com.cartft.touch....deb“.
     You can either install the app directly or through BigBoss-Market (Cydia).

3.) Start the app „CarTFT“. After some seconds the touchscreen is connected and can be used.
     If touchscreen is not accurate, you can perform a calibration in the app.

Notes / Hints

To force your iPhone-system to permanent „Landscape“-mode there are many apps available.
An example is „SBRotator“. And for adjusting picture size & settings you can use the app „Display Out“.
(http://ipad-os.net/displayout-cydia-free/)

Troubleshooting

If touchscreen connection is not working, then first verify that your smartphone is JAILBREAKed correctly.
(see eg. http://jailbrea.kr/)
